BRAINTEASERS

*Fun and
Frustration
Guaranteed*

*Challenge Your
Family &
Friends*

HEALTH WARNING : These puzzles could seriously damage your ego.

MEGA BRAINTEASERS

EGO BUSTER

£25 + £2.50p&p

A horribly difficult puzzle it has all but two of the shapes that can be made using six squares. It can take months rather than days to find new solutions but there are those who enjoy the challenge. There are of course others who have the challenge thrust upon them - the most fiendish of presents!

THE BEAST

£20+£2.50p&p

Each of its pieces is made from five regular hexagons. It took us over a month to fit them into the frame and we have now collected over 40 solutions - there will be thousands more. Perhaps you know someone who should suffer a little!

THE GIANT PYRAMID

£30+£2.50p&p

This puzzle is the hardest of them all with thousands of solutions to go for. With the pieces made up of seven equilateral triangles the challenge is exquisite - taking days just to get to grips with. We would love to know of any solutions you find to add to our collection

Designs and colours are subject to variation at our discretion.
All products are designed to comply with European Standards

Those that have tried our brainteasers before will know that any of the range below will give many hours of fun and frustration. The pieces are coloured on both sides to make them more difficult and they've **all** got lots of solutions. **The more ★'s the harder they are!**

HEXAMINOES ★

Our adult starter puzzle! Each of these seven shapes is made from four regular hexagons. New solutions can often be found in less than an hour but don't forget there are lots of ways of fitting them in the frame.

DIAMONTE ★★

Each of these nine shapes are made up of six equilateral triangles. They can be fitted into the frame in a surprising number of ways, but finding just one can take some time!

MAPPING ★★★

In 1852 Francis Guthrie posed his brother a mathematical problem; to prove that every flat map could be printed using only four colours with no countries of the same colour sharing a boundary. It took 125 years to prove that this 'Mapping Theory' was invariably true. How many ways can you find?

MARBLES ★★★★★

Fitting your marbles into the box was always so easy. Not this time! The number of pieces makes it difficult to hold the shapes in your head and almost impossible to plan forward. Try not to lose your marbles over this one!

THE RED PERIL ★★★★★★

This three level puzzle has ten pieces and hundreds of solutions:

Level 1 – Just fit them in – under 1 hour

Level 2 – Turn it red

Level 3 – Turn it not red with no colour touching itself – this can take many hours!!

Have fun!

CRYPTOMINOES ★★★★★★

These nine tiles are coded with a lock or key on each edge. However be warned that when you turn a piece over to fit one key the coding on the other three sides changes!!

TRIAMINOES ★★★★★★

This tantalising puzzle will challenge the most agile brain. Each of the pieces is made up of all the shapes that can be made with six equilateral triangles and has hundreds of solutions but it can take many hours to find even one.

PENTOMINOES ★★★★★★

This classic brainteaser has twelve shapes each made up of five squares. There are over 2000 ways of fitting them into the frame! Tip them out and try to find even one!

These are available in two sizes **STANDARD £9:95 + £1:50 p&p** and **LARGE £15.95 + £2:50 p&p**

SUPER BRAINTEASERS

£18:50 + £2:50 p&p

BLUE DEVIL

This fiendish puzzle has 18 pieces, millions of different solutions and can be played on three levels - Level 1 – Just fit the pieces in – hours
Level 2 – Turn the puzzle blue – days - Level 3 – Turn it not blue with no colour touching itself – weeks!! It ruined my Christmas just finding one of the 10,440,443 solutions!

How brave are you?

SNOWFLAKE

This puzzle is also made up from pieces with six equilateral triangles but with this layout it is much harder to find solutions. The beauty of this puzzle helps compensate for the frustrations it presents. Keep your cool!

THE MAZE

Be amazed at this brainteaser! It will challenge the most ardent puzzler with thousands of solutions and many hours between each. See how many you can find!

All puzzles in our *Brainteaser* range are made from high quality birch ply from sustained European forests. Each piece is stained and lacquered and, because they are coloured on both sides, the number of solutions is dramatically increased.

All puzzles are available by mail order - Please make cheques payable to Linn Jigsaws
